*INTRODUCTORY*

THE reputation of our walking-canes throughout the United States is the result of the employment of the most skilled workmanship and the use of the best materials, under the direction of expert department heads, and is the outcome of twenty-five years experience and growth.

We manufacture all our walking-canes on the premises, making them up from the raw woods, Ivory and Horn, which we import direct from all over the world.

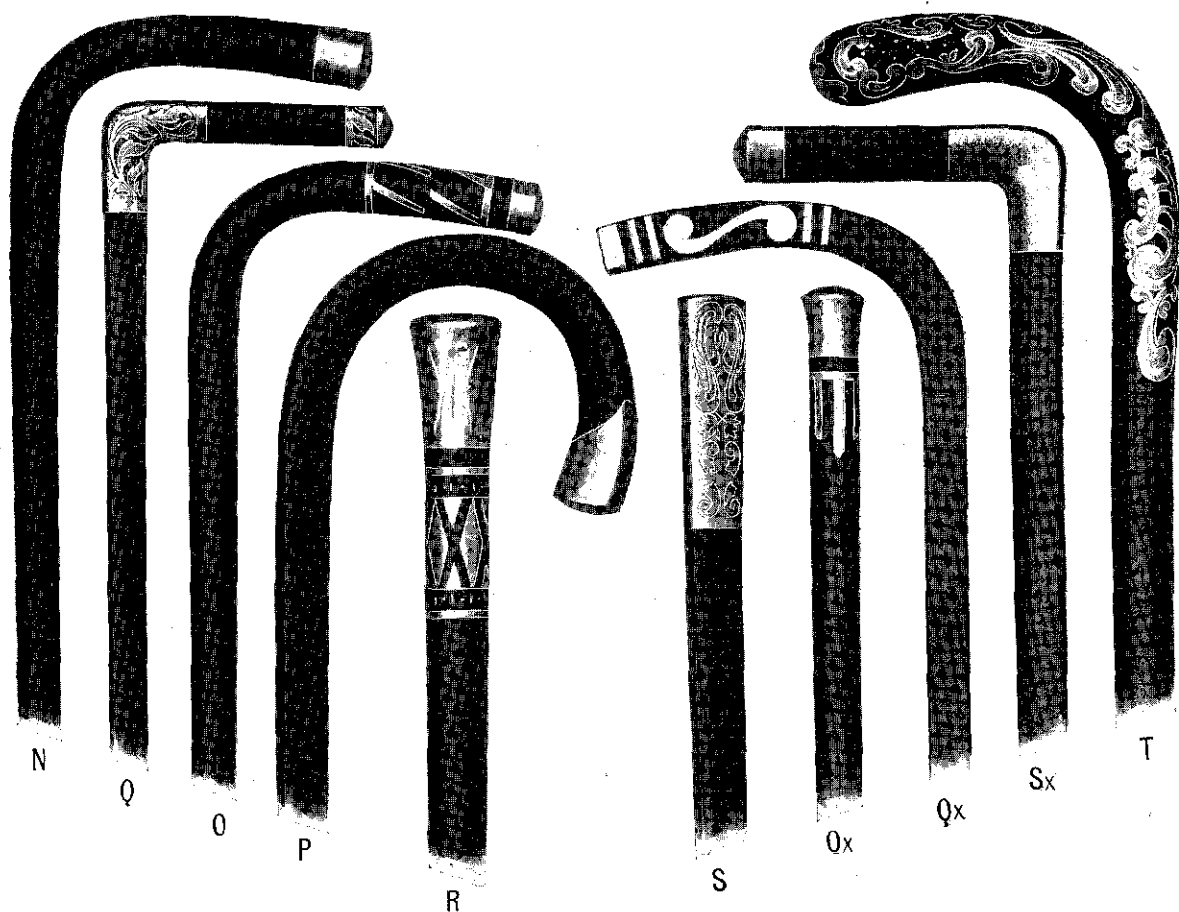

We also do all our own gold and silversmithing, Ivory and Horn cutting and carving, employing the most competent and experienced labor to be had in this country.

We would specially call your attention to the extra fine finish produced on our walking-canes, in which we lead the market. We have the best equipped cane manufactory in the United States, and carry the largest and most complete line of walking-canes in the world.

It is impossible to show all the styles in this catalogue as we originate a thousand new ideas every six months, including the very latest novelties, we being the creators of fashion in walking-canes.

Orders at any stated price placed in our hands, will receive the most careful attention and the benefit of our immense and unlimited assortment.

We also make a specialty of special order work, and are in a position to make anything possible in the way of canes. Our line of riding-crops, whips and corkscrews is also a line of our own manufacture exclusive of any shown in the market.

## PIMENTO CANES

Pimento, a beautiful hard wood from the West Indies, makes not only a strong, substantial cane, but an exceedingly handsome one.

We work it up into Tan, Gray, Rose and Natural Colors.
